Solutions

We strive to provide diverse solutions to the many challenges contractors and government agencies face on a daily basis. Hauser Engineering Group, LLC can provide construction contractors with the support services necessary to stay in compliance with contractual and statutory requirements as well as aid in quality control and project management. We can provide the government with quality personnel to perform project management, quality assurance inspection and reporting, review of construction contract documents, shop drawing review, review of construction schedules and quality control plans, and review & investigation of contractor claims. We have the personnel to monitor contractor safety programs and are well versed in OSHA & EM 385-1-1 Standards. We are knowledgeable of and experienced with mandated reporting requirements of the Davis-Bacon and Related Acts. We also have the knowledge and experience to monitor contractor compliance with environmental regulations.

Core Values

Hauser Engineering Group, LLC is founded on the principle that timeliness and accuracy define how we are perceived by our clients and peers. We strive to be timely and accurate in our responses to our clients' needs. We strive to be timely and accurate in the work we produce. Satisfying our client's needs is our ultimate performance goal.

Differentiators

The staff at Hauser Engineering Group, LLC have intimate knowledge and experience working for federal, state, regional, and municipal agencies throughout the Midwest and Arizona. Understanding the government's needs and the challenges and constraints they operate within enables Hauser Engineering Group, LLC to provide the expertise and solutions required by such a demanding environment. Our staff and consultants are also extremely capable and ready to deliver top quality projects.
